Tom,

FYI, this is the letter that has been signed and sent:

July 11, 2000

Mr. Joseph A Legare
Assistant Manager for Environment and Infrastructure
U.S. Department of Energy, Rocky Flats Field Office
10808 Highway 93, Unit A
Golden, CO 80403-8200

RE: Reconnaissance Level Characterization Report (RLCR) for Building 575 - Concurrence

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division (the Division) has reviewed the RLCR for Building 575, Revision 0 (dated June 26, 2000) received on July 7, 2000. Utilizing the consultative process, minor modifications of this RLCR have been provided to the Division by Mr. Gerry Kelly on July 11, 2000. The Division hereby concurs with the RLCR for Building 575.

As stated in this RLCR, Building 575 is identified as a Type 1 facility. In addition, the Building 575 slab was not included as a part of this specific characterization effort and will remain in place after Building 575 is removed (Section 1.2). Since the characterization performed does not include the slab, further characterization of the slab will need to be performed prior to its removal. As such, please keep us apprised of the future characterization, removal, and disposal actions to be performed regarding the slab associated with Building 575.

If you have any questions regarding this correspondence please contact David Kruchek at (303) 692-3328.

Sincerely,

Steven H. Gunderson
RFCA Project Coordinator
